

Anti-Fracture Membrane AF29

Copes with screed dry out shrinkage cracks; stops them from telegraphing up through your tile or stone.

- ✓ **Stops settlement cracks and vibration in new build from ruining perfectly good tile and stone installation.**
- ✓ **Fast-Track ready mixed with hand roller application.**
- ✓ **Can be applied to curing substrates.**
- ✓ **Safe to use inside.**
- ✓ **Saves your investment, be it 9000M2 shopping mall or 90 high end en-suites in your clients hotel or a 9m2 porch in your home. If you are laying Natural Stone or Ceramic Tile make sure your installer has laid AF29 first, at 1.2 mm thick; it makes no difference to the build up thickness. However, it can make all the difference to you and your client.**
